## 1. A Laboratory Manual for the SPARC

The lab manual is complete in that it covers all of the **SPARC** operations and instruction formats. As such, students should not require individual copies of The **SPARC** Architecture **Manual**. However, we have found it useful to have copies of the **SPARC** Architecture **Manual** available to students on a reference basis.

## 2. A Laboratory Manual for the SPARC Revision 12

This **laboratory manual** was developed to provide a "hands on" introduction to the **SPARC** architecture. The labs are based on ISEM, an instructional **SPARC** emulator developed at the University of New Mexico. The ISEM package is available via anonymous ftp. To obtain a copy ftp to cs.unm.edu and cd to pub/ISEM.

In Lab 11 we consider the use of register windows on the **SPARC**. In Lab 12 we complete our coverage of procedure calling conventions by considering the standard calling conventions used by compilers. 10.3.1 Register usage The **SPARC Architecture Manual** describes a class of procedures called optimized leaf procedures.

## 6. SPARC

A complete user's guide is provided for **SPARC-90** (along with **SPARC-87**). A code description, code operating instructions, partial code listing, examples of the use of **SPARC-90**, and summaries of experimental data comparison studies also support the use of **SPARC-90**. 29 refs., 4 figs., 11 tabs.

Dr. Myer supported the founding of and directed The SPORT Center and The Human Performance **Laboratory** in the Division of Sports Medicine at Cincinnati Children's Hospital Medical Center.

## **26. Stimulating Peripheral Activity to Relieve Conditions SPARC**

**The** Common Fund's Stimulating Peripheral Activity to Relieve Conditions (**SPARC**) program seeks to accelerate development of therapeutic devices that modulate electrical activity in nerves to improve organ function.**SPARC** is generating maps and tools to identify and influence therapeutic targets that exist within the neural circuitry of a wide range of organs and tissues.

## **27. Increased expression of osteonectinSPARC mRNA and protein**

**The** osteonectin/**SPARC** antibody used in the present work is specific for human osteonectin/**SPARC** despite its similarity in epitope to a related protein called SC-1/hevin . We are confident that the protein detected in the lens epithelium is not SC-1 because we detected no band of 65,000 Da or greater, as reported for SC-1 [ 27 ].
